

Format/Resample Pictures

Partaker, retrieve **Brief Review Project I** or what will soon become the **Brief Review Project II** PowerPoint® file, so additional learned tasks can be demonstrated to the document.

- Display Slide View to execute tasks – tasks must be completed here. This time add two pictures of your choice or use provided pictures – see picture links below. The 2-new slides (now, total of 3-slides) must exhibit a picture and can be the same picture because the 2-slides will *serve two different purposes*: **first-slide** is required to show an **On-screen image** format and the **second-slide** is required to show a **Print image** format. Verify picture slides by labeling pictures purpose – onscreen or print.
- **Turnout Slides** by way of previous slides' instructions: **Insert Picture & Format Picture – PPT Checklist** or **Resample & Insert Image – Image-Editing Checklist** and **Image Characteristics: Pixel Guidelines I & II**.
- If working with a new theme, please insert name and email address by way of using the **Header and Footer tool**.
- After completing assignment, save file out using a new file name (for example: Your Initials Here_Project2.ppt). Then, proof **Brief Review Project II** file by way of: **On-Screen Display** (**View > Slide Show**) or **Printout** (**File > Print**) . Last, forward **Brief Review Project II** results by using the **Send for Feedback icon (email hyperlink)** or **upload file (drag & drop)** by **file-transfer protocol (ftp)** delivery – for instructions contact, [coach](#). Shortly, you will be given helpful feedback so a meaningful learning experience is achieved. At this time, you may resume to next objective.
